-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 September 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Applicant's amendments in the reply filed on 09/18/2008 is acknowledged and entered into the record.
2. Accordingly, Claims 1-22 and 25 have been cancelled, new claims 26 and 27 have been added.
3. Claims 23, 24, 26 and 27 will be examined on the merits.

Priority

4. The petition submitted on 09/18/2008 for priority to U.S. Serial No. 09/918,715 filed August 1, 2001 and to 60/228,850 filed April 11, 2001, 60/224,360 filed August 11, 2000, and 60/222,599 filed August 2, 2000 has been dismissed. The current priority date for the instant application is 07/02/2002.

Claim Rejections Maintained - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Rejection of Claims 23, 24 and newly added claims 26 and 27 under 35 U.S.C. 102(e) as being anticipated by Long et al. (PgPub 20040214241) is maintained for the reasons of record.

7. Long et al. teach a method of isolating, purifying and characterizing precursors to osteoblasts. Long et al. disclose a method of obtaining a population of cells, from bone marrow, bone (tissue), or peripheral blood cells (bodily fluid), contacting said cells with an antibody, and removing cells of the population that do not immunoreact with said antibody (See sections [0035-0038]). Claims 16 and 18-20 of Long et al. disclose the use of an osteonectin antibody to isolate specific cells. Long et al. teach the active steps of contacting a population of cells with an osteonectin antibody, detecting the cells which have bound to said antibody, and isolating cells which have bound to said antibody. Therefore, Long et al. inherently teach a method of identifying tumor endothelial cells by performing the active steps of the method claimed in the instant application.

8. Applicants argue that Long et al. do not anticipate the amended claims because "Long et al. does not teach contacting a population of tumor cells with an antibody as recited in the first step of claim 23". Long et al. teaches contacting a population of cells with an osteonectin antibody and isolating the cells that bind to said antibody. The isolated cells would be identified as "tumor endothelial cells" (as claimed) because they bound to said antibody. The rejection of record is maintained.

Conclusion

9. Claims 23, 24, 26 and 27 are rejected
10. No Claim is allowed.
11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
